Welcome aboard this brand new never launched 2010 Sunstar Coastal Yacht. This boat has all the upgrades including upgrade cherry interior finish, and granite counters throughout just to name a few. Entering this beautiful vessel from the front one of the first things you will notice is the rich feel of the cherry wood finish. You have a very well appointed salon with comfortable couch, chairs and flat screen TV. To the starboard side is the lower helm station.

Just aft of the salon is the galley and dinning area. Here you have all stainless steel household sized appliances, 4 burner range and oven, dishwasher, built in microwave, granite counters, and seating for 4 at the dinning table plus 2 more at the bar. There’s even a wet bar.

Off to the port is a full size cuddy with built in storage. Past the galley you have the VIP stateroom that shares the day head. Further aft there’s a full beam master stateroom with a panoramic view via a sliding glass door. There’s also a full in suite head.

Leaving the cabin through the sliding glass door you walk out onto the aft deck with 24” swim deck and easy access to the engines through large hatches.

From there it’s up a set of steps to the bridge deck with a bar and 4 stool. The bar is covered with a 18’ fiberglass hard top. Forward is the flybridge with lots of built in seating.
